

Information about the Fillable Version of the IA 1040 Return

- The fillable IA 1040 automatically creates a computer generated barcode on the return. The barcode allows the return to process faster than a handwritten paper return.
- Because the computer generates the barcode, all entries on the fillable IA 1040 must be made on the computer before the return is printed.
- **DO NOT change anything on the fillable return once it is printed.** If you make changes after the return is printed, the barcode will not reflect those changes. The computer system the Department uses to process your return, only reads the barcode, not anything written after the return is printed.
- Please consider filing electronically and receive your refund in 2 weeks or less!
